

# Think. Innovation

**Looking for new business leads?**

**Want to produce exciting new products?**

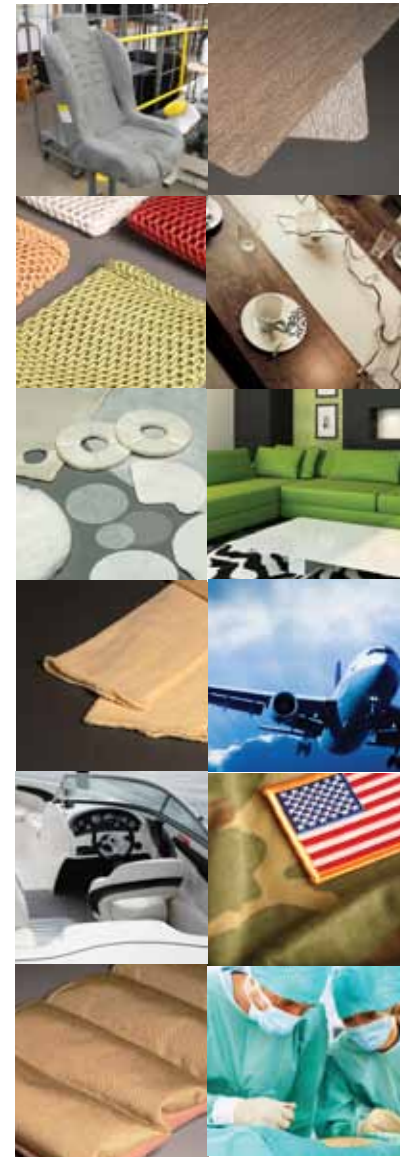

**We are Fairway Innovations and we can help you.**

Are you a manufacturer who is ready to make a difference in the lives of inventors, non-profits, small businesses and Michigan as a whole?

Fairway Innovations is a haven for inventors and inventions. What we do is turn a creative genius' ideas into reality. If they can think it, we can make it happen. We can prototype, manufacture and market ideas or products as well as help the inventor obtain financing and non-profit business partners, if desired, for their domestically manufactured project (you read that right!!!) – All here in the Great Lakes State. We will also assist in finding appropriate sales channels to get your project sold!

**Our goal is to keep Michigan manufacturing.** It's what we have done since before the dawn of the industrial revolution. We also want to keep the development of new inventions right here in the United States; train the next generation in high-paying manufacturing jobs; and support our member manufacturers with new profitable business opportunities. Our success also affords us the ability to give back to the community through local, state, national and even international philanthropic organizations.

We will do what it takes to get inventor's products to market so that they can do what they do best - invent! Together we can make manufacturing relevant again in Michigan and once again GROW our economy.
